CME The Seton Family of Hospitals is accredited by the Texas Medical Association to provide continuing medical education for physicians. The Seton Family of Hospitals designates this educational activity for a maximum of 15 *AMA PRA Category 1 Credit(s)*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity

CNE Seton Family of Hospitals is an approved provider of continuing nursing education by the Texas Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

This educational activity will provide up to 15 contact hours.

Please note: No CNE/CME credits will be provided with student registration. Must show student ID at conference registration

Seton Family of Hospitals is excited to announce the 2011 Austin Trauma & Critical Care Conference to be held at the AT&T Executive Education and Conference Center on June 2-3, 2011.

Physicians, nurses, allied health and pre-hospital personnel are all invited to attend this exciting educational opportunity.

OBJECTIVES

- Compare and contrast the development of three Texas trauma centers: Parkland Hospital, Ben Taub Hospital and University Medical Center Brackenridge.
- Identify and discuss changes in the management of the pediatric trauma patient such as airway management, concussions and non-accidental trauma
- Describe the impact of each of the following topics on current trauma care: tranexamic acid, military research initiatives, the results of the ACS Texas Trauma System Survey and hypothermia in the treatment of traumatic brain injury.
- Examine the various surgical techniques and overall management of patients suffering from urethral, liver, tracheal, and gunshot wound injuries.
- Assess the impact of new knowledge and techniques on the care of the acute care surgery and trauma patient
- Evaluate lessons learned from the military and discuss the impact of military advances on civilian trauma and acute care surgery.
- Discuss how the following topics can affect the delivery of pre-hospital care: EMS trauma care- Science VS Urban Legend, the debate over House Bill 3588 and the presence of Tactical EMS providers
- Present the changing principles and concepts relating to patient care in the Emergency Department: the use direct laryngoscopy, emergency surgical procedures, pediatric pain control and early pelvic fracture management
- Examine the following challenges to the care of the trauma patient in the Intensive Care Unit: monitoring and resuscitation of pediatric patients, treatment of the post-cricothyrotomy patient, causes and management of the delirious patient, initiating mechanical ventilation
- Critique the following process improvement initiatives in the field of trauma care: maximizing collections at trauma centers, developing a High Reliability Organization, new pain control options for rib fractures and military trauma training systems
- Discuss management techniques and the use of technology in the treatment of acute care surgical issues such as: complications of bariatric surgery, acute diabetic foot infections; esophageal perforations and massive GI Bleed.
- Discuss the psychosocial aspects of trauma such as intimate partner violence, the effect of race and insurance status on trauma outcomes and end of life care in trauma populations
- Present and discuss some of the controversial topics in trauma and critical care such as the risk of radiation exposure, post traumatic stress disorder, massive transfusion practices and myth vs reality in forensic evidence collection
- From the trauma cases presented compare and contrast treatment plans and decision making between different types of trauma facilities.
- Discuss the appropriate response to injuries and illness with added complicating circumstances such as the elderly anticoagulated patient, pulmonary injury with resection, popliteal artery with vein injury, any injury accompanied by cirrhosis.
- Describe the key management principals for patients requiring the following surgical interventions: fasciotomy for compartment syndrome, penetrating cardiac injury, injuries to the subclavian vessels and the vena cava.

EDUCATIONAL METHODS

The conference will include didactic lectures, panel discussions, audiovisual aids, course syllabus, and questions and answers.

HOTEL INFORMATION

AT&T Executive Education and Conference Center
1900 University Avenue,
Austin, Texas 78705
Call 512-404-1900 or 877-744-8822 for Reservations.
Please reference conference code TRAUMA0611 for a special conference rate.

A U S T I N

Trauma & Critical Care Conference

June 2-3, 2011

AT&T Executive Education and Conference Center

Austin, Texas

Austin is home to the Capitol of Texas, great live music, and some of the leading minds in medicine. Come join us! You can see bats fly from the Ann Richards Bridge, enjoy the city's live music, and hear from the nation's experts in Trauma and Critical Care.

PROGRAM

The Austin Trauma & Critical Care Conference offers basic and cutting edge guidelines and technology for evaluation, diagnosis and management of trauma patients. The curriculum is designed to enhance the knowledge and skills of physicians, nurses, allied health, and pre-hospital personnel caring for critically ill and injured patients in rural, urban and suburban hospitals.
